

**94-0060**

The invention relates to the fungicide remedy and the method of mushroom's fighting. The problem of the invention consists in increasing biological activity by 1,5 times or even more due to the fact of using fungicide remedy in the form of concentrate past in suspension which contains 4-3-(4-tret butylphenyl)-2-methylpropyl-cis-2,6 dimethyls morpholyn (phenpropymor-6h) and 1-2-(2,4-dichlorphenyl)-4-n-propyl-1,3 dioxolan-2-il-methil-IN-1,2,4-triazol with the mass transfer coefficient of ()1:5-(5:1) one dose of 50-425 gr/hectare, in comparison with the known remedy and the method based on phenpropymorfy and 1-tretbutil-2-(1N-1,2,4-triazolam-il)-2-(2,4-chiclorbenzil)-ethanol. 1 tab.
