The invention relates to perfume industry, particularly to perfume compositions used to produce perfumes and Eau de Colleague. The smell of the composition is achieved by association of different floral harmonies which remind the smell of roses and jasmine with light nuances of geranium. The composition consists of the following components. The ratio is given in % of mass:

Arovanilon, alcohol solution 10%	0,5-0,9
Eremites oil	0,8-1,2
Aldehyde - amilcinamine	0,8-1,4
Composition "Jasmine 222"	0,8-1,2
Linalool "D"	1,1-1,6
Terpineol	1,8-2,3
Benzoic acetate	1,9-3,1
The perfumery Citrate	3,0-3,8
Hydroxicitronel	4,6-6,0
Cieraniol	4,8-6,4
Zoengenol	6,8-9,0
Rose volatile	6,8-7,7
Geranium volatile oil	6,0-7,3
Citronella	16,0-20,0
Phenilethil alcohol	10,0-14,9
Diethylftalat	20,9-26,2.
