

94-0252

The invention relates to a new chemical compound biological activ, tin perchlorate fluoride monohydrate with the formula $F-Su-OCIO_3 \cdot H_2O$ which possesses a stimulating capacity of the growth of cyanobacteria spiruline a producer of food protein and fodder protein, vitamins and other substances. The use of tin perchlorate fluoride monohydrate, ensure the encreasing of the speed of the growth with 19,43-23,29% given to K1 and with 11-14,6% given to SuF_2 .
