

**94-0259**

The proposed according to the invention compounds possess fungicidal properties and are useful as fungicidal biologic active substances, particularly for utilization in the agriculture and horticulture.

The oxymethers have a general formula (I):

The process of obtaining compounds of the formula (I) is characterized by the fact that the oxym Z-OH, wherein Z - aldimin - or ketimin - group is introduced into the reaction with the benzyl alcohol derivatives.

The fungicidal agent as an active starting comprises oxymethers of general formula (I) in an amount of 0,0001-85% and additives for special purpose.
