

94-0333

The invention relates to the inclusion complex of N-ethoxycarbonyl-3-morpholinsydnonimine or salts thereof with cyclodextrin or its derivatives, preparation thereof and pharmaceutical compositions containing them, method of preparation thereof and treatment method.

Inclusion complex of N-ethoxycarbonyl-3-morpholinsydnonimine or salts thereof with cyclodextrin or its derivatives are prepared by:

- a) interaction of N-ethoxycarbonyl-3-morpholinsydnonimine or salts thereof with cyclodextrin derivative into the solvent and extraction of the complex from the solution by dehydration or
- b) fast milling of N-ethoxycarbonyl-3-morpholinsydnonimine or salts thereof with cyclodextrin derivative.
