

94-0360

The invention relates to a composition, characterized by formula (I)

and the salts thereof in which R¹ represents methyl, ethyl or isopropyl group,

R² - halogen atoms, C₁₋₈-alkyl group or C₃₋₈-alkenyl group, and the group =NOR² is in E-configuration.

OR³ represents hydroxyl group or substituted hydroxyl group, containing up to 25 carbon atoms.

These compositions may be used as antibiotics for human and animals treatment and for the control of agricultural pests.
