

95-0016

The invention relates to the Method of obtaining cis-2-(1H-1,2,4-triazole-1-yl-methyl)-2-(halogenphenyl)-3-(halogenphenyl)-oxirane with the following formula:

The purpose of the invention is to increase the going out of the product with a special purpose and to diminish the cleaning expenses.

The method if put into practice by the epoxidation of Z-3-(1H-1,2,4-triazole-1-yl)-2-(halogenphenyl)-1-(halogenphenyl)-propene with Permalloy acid with a further renewal. As a restorer may be used sodium hydrosulfite, sodium dithion or sodium thiosulfate or hydrogen in the presence of rhenium nickel. the restorer is added to the reaction composition in a quantity exceeding the quantity which is necessary for the dissociation of probably existing Permalloy acid.
