

**95-0064**

The invention relates to the microbiology, especially to the Campylobacter cultivation.

In order to make culture medium's terms of keeping longer, the appearance terms of Campylobacter colonies - shorter and the technology of medium preparation easier, the medium consists of (volume %):

gelosis	- 68,2-91,9
defibrinated Ram blood	- 5,7-7,5
yeast extract	- 1,2-22,8
blend of antibiotics	- 1,2-1,4
nizoral	- 1-10 mg/l
rifampicine	- 4-16 mg/l
cephazoline	- 9-12 mg/l
polimyxine M sulfate	- 2500-7500 units/l.
