

96-0227

The invention relates to the animal-pest destroyers: of the sewer rat, mole-rat, hamster and gophers.

The rodent destroyer contains a body 1 with a slaughtering appliance, a helical spring 3 and a trigger mechanism, the slaughtering appliance being made in the form of a projectile 2, placed into the body 1 and being connected with the helical spring 3 and the trigger mechanism 4, which contains the hinge connected links, on one end of which is being placed a stop 6, on the other end - a fixing rod 5.

The technical result of the invention consists in the operation speed of the device.
