

**96-0254**

The invention relates to the agriculture, namely, to the cold accumulators for agriculture products storage.

The cold accumulator contains the freezing tank 1, fan 2, water level detectors 3, control unit 4, winch 5 with electromotor 6, fixed to the tank cover 1 and water feeding system 7. The fan and water level detectors are suspended by winch rope.

The technical result consists in the suspending the fan on the optimum distance over the frozen water surface.
