

99-0002

The invention relates to the biotechnology and may be used in the microbiologic industry for lipolytic ferments preparation.

Summary of the invention consists in extraction of the *Pseudomonas* sp. 1 bacteria strain which may be used as a biologic active materials source.

The strain is deposited in the National Collection of Microorganisms of the Institute of Microbiology of the Academy of Sciences of the Republic of Moldova, No CNM-PsB-01.

The result of the invention consists in the high extracellular lipolytic activity.
