

**99-0006**

The invention refers to the canning industry, particularly, to the production of vegetable concentrated mixtures.

The composition contains tomato pulp, sweet pepper pulp, sodium chloride and additionally contains pumpkin mash in the following composition ingredient ratio per 1000 kg:

tomato pulp	598
sweet pepper pulp	150...200
pumpkin mash	200...250
sodium chloride	2.

The technical result consists in improving the product organoleptic characteristics and increasing the range of pastes.
