

99-0187

The invention refers to the chemistry field, namely, to derivatives of alkylaminic salts of N,N¹-malonyl-bis-p-aminobenzoic acid which possess a biologic activity and may be used in medicine.

There are claimed alkylaminic salts of N,N¹-malonyl-bis-p-aminobenzoic acid of general formula:

where R₁ is H, CH₃;

R₂ - H, CH₃, C₂H₅, C₂H₄OH;

R₃ - C₂H₅, C₂H₄OH, C₃H₆OH, CH(CH₃)-(CH₂)₃-N(C₂H₅)₂,

as well as a process for preparation and utilization of such compounds as hypotensive and antiarythmic remedy.
