

a 2001 0302

The invention refers to biotechnology, in particular to the strain of *Aspergillus niger* fungi, which may be used in the microbiological industry for lipolytic enzyme obtaining.

The strain of *Aspergillus niger* is deposited with the National Collection of Microorganisms (Institute of Microbiology of the A.S.R.M.) under the number CNM FD 01 and it is the source of lipolytic enzymes.

The result of the invention consists in increasing the activity of lipolytic enzymes.
