

a 2005 0171

The invention relates to zootechny, namely to the forage production.

The feed additive for calves includes pea, sunflower grits, fodder yeast, tricalcium phosphate, table salt and premix, having the following component ratio, mass %:

pea	8,0...11,00
fodder yeast	30,0...32,0
Sunflower grits	47,0...50,0
Tricalcium phosphate	4,5...5,5
table salt	1,7...2,3
premix	2,8...3,2

at the same time the premix contains, g/t:

copper	1850...2000
zinc	13320...14800
cobalt	185...200
manganese	13320...14800
iodine	80
selenium	74...82
vitamin A, mln. IU	2000
vitamin D <sub>3</sub> , mln. IU	180
vitamin E, mln. IU	5,2
filler	the rest.
