

The invention refers to cyanoanthranilamide compounds, compositions on base thereof and a method for invertebrate pest control and can be used in the agriculture and in other fields.

The invention represents a compound of formula (I), or the derivatives thereof in the form of N-oxides or salts thereof

wherein:

R¹ is Me, Cl, Br or F;

R² is F, Cl, Br or C₁-C₄ haloalkoxy;

R³ is F, Cl or Br;

R⁴ is H, C₁-C₄ alkyl, C₃-C₄ alkenyl, C₃-C₄ alkynyl, C₃-C₅ cycloalkyl, or C₄-C₆ cycloalkylalkyl, each optionally substituted by a substituent, selected from the group consisting of halogen, CN, SMe, S(O)Me, S(O)₂Me and OMe;

R⁵ is H or Me;

R⁶ is H, F or Cl and

R⁷ is H, F or Cl.

The invention also refers to compositions on base of cyanoanthranilamide and to a method for invertebrate pest control, containing a biologically effective quantity of one of the above-mentioned compounds and at least one additional component, selected from the group consisting of a surfactant, a solid diluent and a liquid diluent.
