

a 2006 0101

The invention refers to agriculture, in particular to the protection of farm crops and may be used for controlling bruchids.

The method of bruchid control includes treatment of the leguminous plants with aqueous suspension of *Nostoc linckia* (Roth) Born et. Flash blue-green algae culture cells in the concentration of 1000...3000 cells/ml, at a total consumption of 400...450 ml/m², and the plant treatment is carried out in the phase of developed immature legumes.
