The invention refers to agriculture, in particular to the fruit growing, namely to a process for apple-tree treatment.

The process, according to the invention, consists in the extraroot treatment of apple-trees in the rose bud phase with 0.001% aqueous solution of steroid glucoside with the formula 3-O- $\{[\alpha\text{-L-ramnopiranozyl}(1\rightarrow2)]\text{-}[\alpha\text{-L-ramnopiranozyl}(1\rightarrow4)]\text{-}\beta\text{-D-glucopiranozide}\}\text{-}[(25\text{S})\text{-}5\alpha\text{-furostan-}3\beta,22\alpha,26\text{-triol}]\text{-}26\text{-O-}\beta\text{-D-glucopiranozide}$ with a total consumption of 800... 1000 l/ha.

The result consists in the temporary delay of the flowering processes of a sufficient number of buds and in controlling the fruit tree flowering process.
