

a 2012 0019

The invention relates to biotechnology, in particular to a strain of filamentous fungi *Fusarium gibbosum* and can be used to obtain complex hydrolytic enzymatic drugs.

The fungus strain is deposited in the National Collection of Non-Pathogenic Microorganisms of the Institute of Microbiology and Biotechnology of the ASM under the number CNMN-FD-12 and can be used as a source of acid and neutral proteases, xylanases and β -glucosidases.
