The invention relates to chemistry and medicine, namely to the use of a copper coordination compound from the class of transition metal thiosemicarbazones. This complex exhibits high antimicrobial activity against bacteria of the species *Acinetobacter baumannii* and can be used in medicine and veterinary medicine as an antimicrobial drug. Summary of the invention consists in the use of a coordination compound chloro-{*N*-prop-2-en-1-yl-*N'*-[1-(pyridin-2-yl)ethylidene]carbamohydrazone}copper of the formula:

as an inhibitor of the reproduction of bacteria of the species *Acinetobacter baumannii*.
