The invention relates to biotechnology, namely a nutrient medium for the cultivation of yeast strain *Saccharomyces carlsbergensis* CNMN-Y-15, and can be used in the food industry, pharmaceuticals and veterinary medicine.

The proposed nutrient medium contains peptone, glucose, yeast extract, molasses, zinc acetate, zinc alaninate and drinking water up to 1 liter, in the following component ratio, g/L:

peptone	20.0
glucose	20.0
yeast extract	10.0
molasses	69.0...87.0
zinc acetate	0.31...0.33
zinc alaninate	0.13...0.19
drinking water	up to 1L.
