

a 2013 0095

The present invention relates to new compounds that are sodium channel inhibitors and to their use in the treatment of various disease states, including cardiovascular diseases and diabetes.

The structure of the claimed compounds is given by Formula II:

II

wherein R^2 , R^3 , R^4 , R^{10} , R^{17} , m and n are as defined in the description.
The compounds function as late current sodium channel blockers.
