

a 2017 0075

The invention relates to coordination chemistry, namely to a cadmium(II) polymer coordination compound with 2-hydroxy-5-[4-[(2-pyridinylamino)sulfonyl]phenyl]azo]benzoic acid and 1,2-bis(4-pyridine)ethane,  $\{[\text{Cd}(\text{HSAZ})(\text{bpe})] \cdot 0.5\text{HCOOH}\}_n$ , with the structural unit:

The compound exhibits luminescent activity.
