

s 2010 0026

The invention relates to cryobiology and cryomedicine, in particular to a medium for cryoconservation of human sperm.

The medium for cryoconservation of human sperm contains sodium citrate, glucose, sucrose, egg yolk, glycerine and bidistilled water in the following ratio of components:

sodium citrate, g	1.1...1.4
glucose, g	1.8...3.0
sucrose, g	6.0...8.4
egg yolk, ml	24.0...28.0
glycerine, ml	3.8...4.2
bidistilled water	the rest, up to 100 ml.
