

The invention relates to agricultural machinery industry, namely to the construction of the tool of the agricultural waste, mainly fruit-tree branch and sarment shredders.

The tool of the agricultural waste shredder comprises a shredding chamber (1) with a rotor (4) with horizontal axle, a roller (2) with pins for the collection of agricultural waste and extractors (3) of the agricultural waste from the pins of the roller (2). On the rotor (4) are fixed alternating hammers (5) and knives (7). On the inner surface of the lower wall of the chamber (1), at a minimum distance from the hammers (5), are fixed countercuts (6), and at a minimum distance from the knives (7) are fixed slit-like countercuts (8).
