

The invention relates to agricultural machinery industry, namely to ventilatory-atomizing units of the tall tree sprayers.

The ventilatory-atomizing unit of the sprayer comprises a horizontal shaft (1), on which are symmetrically placed two axial fans (2, 4) with diffusers (3, 5) and atomizers. The diffusers (3, 5) are rigidly secured on the frame of the sprayer. At least one of the fans (2, 4) is made with the possibility of regulating the angle of attack of its blades.
