The invention relates to animal husbandry, in particular to the stimulation of spermatogenesis in rams, and can be used to preserve, improve and efficiently use the local gene pool.

The method for stimulating spermatogenesis in rams in the inter-season comprises feeding rams in the inter-season with a combined feed with the addition of a complex biopreparation from *Spirulina platensis* CNM-CB-02 cyanobacterium biomass in an amount of 0.5-5 g per 0.5 kg of feed, daily for 45-50 days.
