The invention relates to medicine, namely to the clinical immunology.

Summary of the invention consists in the fact that the active substances are extracted in the boiling process from the vegetal therapeutic raw material, which includes in mass %: the milfoil grass (*Achillea millefolium*) 5...15, the pot marigold flowers (*Calendula officinalis*) 5...15, the stinging nettle leaves (*Urtica dioica*) - the rest, having the vegetal therapeutic raw material ratio: water 1 : 50. The boiling is carried out during 2...3 min, then the obtained extract is cooled up to 35...37°C and it is filtered. The filtrate is diluted with distilled water 1 : 10 respectively, it is filtered through kaolin, it is supplementary filtered and sterilized.

The result consists in obtaining a remedy modulating the macrophage activity and proliferation of B- and T-lymphocytes.
